I just wanted to say Thank You!

I'm having water with the pinch of baking soda and salt (I made my assistant run out and get me baking soda!) and I'm very inspired to do all the things you recommended.

I didn't know what to expect coming in there, but it was WAY beyond whatever that was.

Thank you so much for all this helpful information.

I really appreciate you explaining this to me especially since you haven't even seen me as a patient.

I can tell you really love your work and I know not many doctors would do this.

You are a precious person, a very dedicated and knowledgeable professional and your culinary raw delicacies are so very gummy that they make me want to devour all of your delicious creations... Thank you for the gummy feast and the healing hugs.

You possess a very unique blend of warmth and softness with an incredible strength, stamina and solid determination. You are very welcome to use some or all of my expressions as a testimony regarding the promotion of your business. Hoping I can reciprocate your magnanimous spirit and also send you clients in the nearest future.

I found the consultation with Rick very informative, understandable and helpful. I'd give it a 10. I would give high marks for the comfort scale also. I think Rick works to make the information "user friendly" and not too intimidating. There is a lot of information for me to work through and incorporate into my lifestyle and I definitely got what I was looking for from the consultation.

Rick's use of metaphor and analogy makes it easy to understand biology!

- The health session with you, the live blood cell test and analysis was absolutely amazing, so progressively accurate and I think so very necessary for anyone who cares about his/her health and well-being.
- In my opinion as a wellness coach I feel that everyone should monitor their blood cells regularly and the level of alkalinity as the basis to maintain the optimum level of wellness.
- Your knowledge regarding acid-alkaline balance and more along with your kind heart and generosity of your spirit made me wish for more beings just like you in this universe.
- I am full of admiration and respect for your commitment and dedication to serve others and to assist in the achievement of their highest level of wellness on all levels of being because by mastering our health we become masters of our life. This and more is what you have achieved for yourself already.

Rick Panson provided me with a wealth of information on raw food and food in general. He gave me a small list of things I could change right away and I felt the difference within a week. He also gave me advice for what I could do in the long run.

I really appreciated his ability to share all his knowledge without being overwhelming and in a way that felt do-able.

I am so happy that I went to see Rick. Seeing my blood under the microscope was a big wake-up call. The information he provided was so well presented that I had many "aha" moments.

My whole outlook shifted and I left the appointment feeling hopeful and positive, feeling like I had started a new, exciting path to perfect health.

Thanks so much Rick for your generosity, wisdom & knowledge.

As a 2-year breast cancer survivor, I had followed the regime of a well known and respected nutritionist for over a year and a half. Although I was feeling better, intuitively I knew I still didn't have answers.

I sought out live blood analysis after watching the eye opening documentary, "Crazy Sexy Cancer" one night which led me to find Mr. Rick Panson. First off, I was impressed with the generous amount of time he spent counseling me on the initial call prior to the visit. I could tell he was just as eager as I was in getting started.

Rick uncovered issues I thought, in my opinion, I had conquered on my own but evidently was still facing. All kinds of toxicity and entirely too much natural sugar!

While I had been told "You're doing fine!" by my nutritionist, I was still consuming the wrong foods.

The kitchen experience in his home was like "going back to school" as I re-learned so much. I found it refreshing to observe this "pro" prepare raw, living foods as I initially expected the consult would take place in a laboratory or like setting. It "gave me the confidence" like "hey, this isn't so hard. I could do this too!"

It's been 7 months and I've watched my blood improve greatly because Rick's guidance is tailor-made just for me. I'd strongly recommend this test to anyone the next time your doctor wants to slash, burn and drug you!! It is for anyone striving to know the truth about where they stand health-wise and what it really takes to fully heal.
